

Paediatrics at SANITAS

Paediatrics is the medical discipline devoted entirely to treatment children, babies, infants and adolescents.

At SANITAS our Paediatric unit is dedicated to the health and well-being of all children. Our specialists deliver comprehensive and integrated healthcare services with the best knowledge, medicine and technology available in Tanzania.

Children have particular needs as they are still growing and their bodies are changing fast, their immune systems and body regulating systems are less developed than adults, they require different medical treatments and specialist handling for them to accept these medical treatments.

Some of the conditions and assessments our specialists undertake for children at SANITAS include, but are not limited to:

- o General Health check ups
- o Malaria
- o Diet and feeding
- o Vaccinations
- o Allergies
- o Development
- o Asthma
- o Neo natal care
- o Hearing and vision
- o Respiratory infections
- o Chronic disease

See our website for more information on the full range of Paediatric treatments available to you. Or call us to book your appointment today.
