

General Surgery at SANITAS

General surgery is a speciality medical field dealing with surgical interventions required in the torso region, abdominal organs, intestines including esophagus, stomach, small bowel, colon, liver, pancreas, gallbladder and bile ducts etc. General surgeons are also specialists in skin and soft tissue procedures.

At SANITAS our General Surgery specialists have at their disposal our full range of diagnostic services to assess conditions and the necessity for surgery. Our minor surgical facility is available for basic procedures and our external day or in-patient facility is available for more involved procedures.

Our General Surgeons and visiting General Surgeons can perform the following procedures, and more:

- o Trauma surgery
 - o Colorectal surgery
 - o Breast Surgery
 - o Endocrine surgery
 - o Laparoscopic surgery
 - o Dermatological surgery
- and more

See our website for more information on the full range of General Surgery options available to you. Or call us to book your appointment today.
